

Naveen Kumar | Senior Full-Stack Software Engineer (Java & Angular)

Email: naveenkumarprt97@gmail.com | Mobile: 7708498754 | LinkedIn: [naveenkmrprt](#)

PROFESSIONAL SUMMARY:

High-velocity Senior Full-Stack Engineer with 4+ years of experience architecting scalable cloud-native applications and responsive frontends. Proven track record of owning end-to-end development lifecycles (Java 21, Spring Boot 3.x, Angular 17+, GCP, MongoDB). Recognized for solving critical production bottlenecks, enforcing Shift-Left security, and leveraging AI workflows to multiply engineering output.

CORE TECHNICAL SKILLS

- **Backend & APIs:** Java 8-21, Spring Boot 3.5, RESTful APIs, Microservices, Spring Cloud, OpenAPI
- **Frontend Architecture:** Angular 17+, Signals, RxJS, State Management, Responsive UI, Jasmine/Karma
- **Cloud & Infrastructure:** GCP (GCS, Pub/Sub, Cloud Run, WIF), Kubernetes, Terraform (IaC), Docker
- **Databases & Data Integrity:** MongoDB, Oracle DB, PostgreSQL, Aggregation Pipelines, Optimistic Locking
- **Security & DevOps:** MSAL, RBAC, OAuth2, GitLab CI/CD, Tekton, Fossa, SonarQube, Maven/Gradle

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions | Backend & Full-Stack Developer | Dec 2021 – Present (*Promoted to Associate Engineer, April 2025*)

Client: Ford Motor Company | Domain: Global Automobile & Regulatory Compliance

- **Architectural Ownership:** Architected and delivered a zero-to-one global NHTSA regulatory compliance portal, transitioning legacy SharePoint workflows into a modern, automated Full-Stack ecosystem.
- **Global System Design:** Partnered with senior enterprise architects across Germany and the US to define system architecture, utilizing Miro for system design and establishing Architecture Decision Records (ADRs) prior to implementation.
- **Backend Scale & Resilience:** Engineered memory-efficient data parsers and GCS Signed URL offloading patterns to bypass API Gateway limits, enabling scalable batch retrieval and processing of 10,000+ requirement IDs.
- **Database Optimization:** Resolved critical production data-loss issues by designing a key-based MongoDB diffing algorithm for non-destructive batch writes, and implemented advanced 5-stage BSON aggregation pipelines ensuring data integrity.
- **Modern Frontend Engineering:** Engineered a signal-first reactive frontend architecture in Angular, resolving memory leaks via lifecycle-safe teardowns and orchestrating deterministic synchronization for complex multi-country filters.
- **Enterprise Security & IaC:** Enforced strict Role-Based Access Control (RBAC) and Workload Identity Federation (WIF) using custom Terraform-injected configurations, mitigating case-sensitivity vulnerabilities and mapping exceptions to RFC 7807-compliant responses.
- **CI/CD Pipeline Ownership:** Configured and maintained Tekton and GitLab CI/CD pipelines, integrating Fossa vulnerability scanning and SonarQube quality gates to enforce zero-defect deployments.
- **AI-Augmented Delivery:** Reduced boilerplate generation and code-review cycles by ~40% by integrating AI coding assistants into the development workflow, enabling a two-person team to deliver a production-grade compliance portal on a timeline typically requiring 4+ engineers.
- **Quality Assurance:** Established the project's testing foundation from scratch—authoring JUnit 5 and Mockito test suites that achieved >80% coverage—enforcing a Shift-Left quality gate that blocked 3 critical regressions before they reached production.

Client: Macy's Inc. | Domain: E-commerce & Retail Technology

- **System Scalability:** Resolved chronic order-processing bottlenecks in Macy's Unified Order Platform by re-architecting high-throughput RESTful APIs, sustaining reliable processing of 10,000+ daily orders across multiple fulfillment channels and delivering real-time inventory visibility to the Operations UI.
- **Cloud & Cost Optimization:** Architected GCP Pub/Sub batch workflows for data retrieval and engineered a centralized logging framework (Log4j), reducing operational TCO by 35%.

EDUCATION:

Bachelor of Computer Science Engineering Rajalakshmi Institute of Technology, Chennai, Tamil Nadu
